Vinyl Fence

When only the best will do.

Not all vinyl is created equal.

Heartland Outdoor Products knows that you want vinyl for a reason. Whether you value its superior durability, classic beauty, or extreme low maintenance we have you covered.

Who We Are...

Heartland Outdoor Products is a supplier of high quality outdoor living products. Our materials represent the very best of the fence, deck and railing industries and we have designed our product line with the following components in mind: Superior Durability, Classic Beauty, Low Maintenance, and Ease of Installation.

Service Unparalleled

Heartland Outdoor Products is more than just a material company. Our professionally trained staff will walk you through the entire process, from material selection and design, to the final touches of installation.

Simplify Your Quotes

Our in house estimators will turn any drawing into a line item material list, usually within the same day.

How You Want It

Do you like our standard sections or do you need something special? Let us solve your problems with our custom fabrication shop.

When You Want It

We pride ourselves on the best turnaround times in the industry. In stock standard orders are ready for pickup or delivery in under 72 hours.

Where You Want It

Let our yard staff help you load, or let our delivery service save you the trip.

Superior Durability

With enough UV inhibitors to endure even the harshest climates, you can be sure that your fence will stay true to its color and resist fading. And because we use only premium grade extrusions you won't have to worry about the cracking and warping you find with bargain type materials.

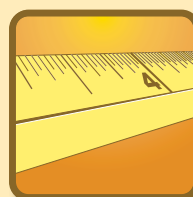

Classic Beauty

A well designed fence creates an inviting atmosphere for your home and provides the perfect backdrop for landscaping. With an array of styles and the ability to "fit" the fence to your yard, you won't be disappointed.

Low Maintenance

We understand how precious your time is, which is why we offer fences you can spend time enjoying rather than maintaining.

Master Your Terrain

Given simple measurements Heartland can alter your fence to conquer your unique setting. Run down a steep hill or step up onto a retaining wall without painful on-site modification.

Features and Benefits

Routed Rails

All pickets are inserted inside the rails, allowing fence sections to be sloped to follow the terrain and providing an infinitely stronger connection than screws or glue.

Good Neighbor Construction

Fully routed construction eliminates the "bad" side of the fence, so the fence will look as good from your yard as it does from your neighbor's.

Routed Posts

All sections are inserted inside the posts, providing a much sturdier connection, with no visible brackets or screws.

Earth Tone Colors

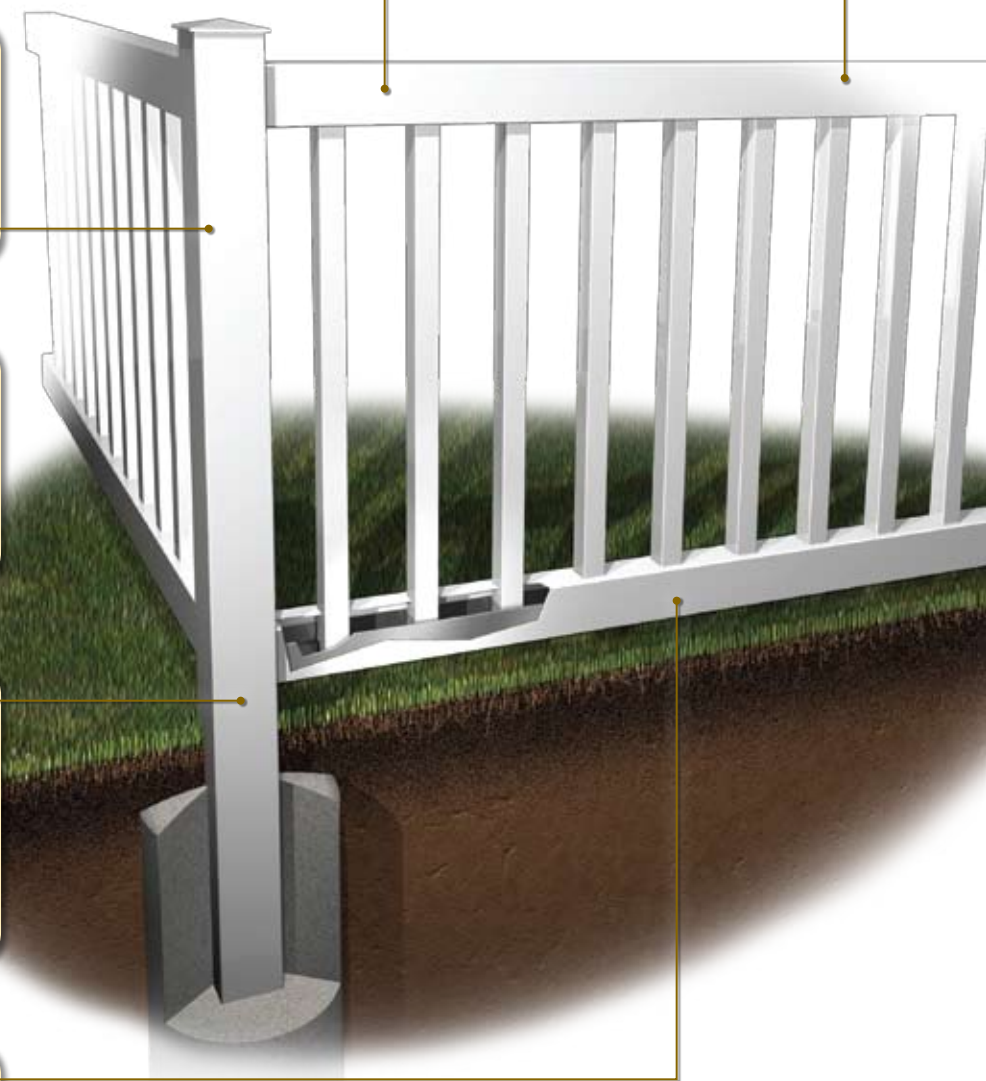

Choose from both white and tan, or opt for the Signature Series for the latest in rich, lasting color.

Heavy Wall Post

With a higher tensile strength than a similar sized wood post, our vinyl posts don't require additional reinforcement. And because they reach 36" below grade they can withstand both high winds and a heavy frost.

Reinforced Bottom Rail

Creates a stronger section without any bowing or sagging.

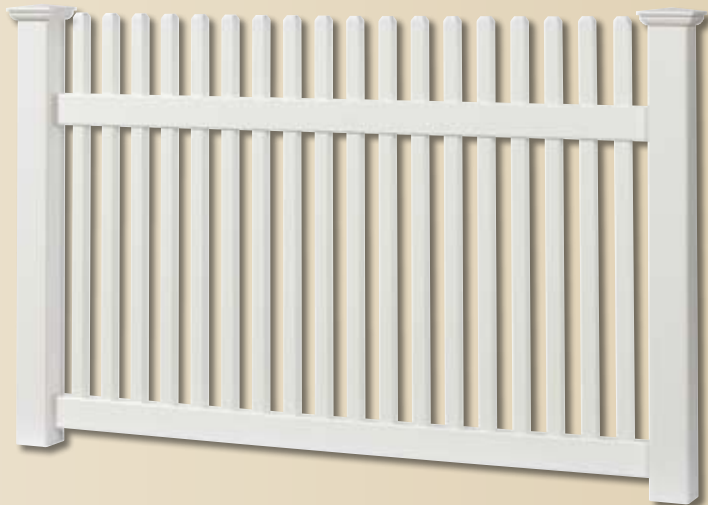

Lifetime Transferable Warranty

Colonial Picket

Concord

Height: 3', 42", 4' and 5'
